Simpler recorder for home sleep testing, applied by the patient themselves: 2 high-frequency channels and 1 AUX channel, plus ECG, pressure and 2 inductive bands.

Channels
2 high-frequency and 1 AUX

Recording
12 hours (according to the…

Description

The Falcon HST (home sleep test) from Compumedics is a recorder for home sleep testing that the patient applies themselves. It is simpler than the Falcon PSG. According to the manufacturer, the results meet the definitions of the AASM (the American Academy of Sleep Medicine).
We will discuss with you beforehand which system and sensors are suitable for children.

Specifications

Type	Recorder for home sleep testing, applied by the patient themselves. Simpler than the Falcon PSG: 2 high-frequency channels and 1 AUX channel. According to the manufacturer, the results meet the definitions of the AASM (the American Academy of Sleep Medicine).
Channels	2 high-frequency channels (EEG, EOG or EMG), 1 AUX channel, ECG, airflow via pressure, thoracic and abdominal bands (inductance plethysmography), 3-axis position and movement sensor and a Bluetooth wrist oximeter.
Recording	Rechargeable Li-ion battery, 12 hours of recording according to the manufacturer. 4 GB of storage in the device.
Connection	Bluetooth 5.2, docking station for charging and data transfer, colour touchscreen.
Dimensions	82.5 × 58.5 mm
Software	Profusion Sleep 5 (Falcon HST Edition), or neXus 360 in your own network.
